

RGM-SM-PP Polythene Waterproof Membrane

Description

RGM-SM-PP Polythene waterproof membrane is one kind of multi-layer polymer waterproof membrane, made of polyethylene, high-strength polypropylene (polyester) non-woven fabric, ultraviolet light-shielding agent, anti-aging agent and other high-molecular raw materials, and is extruded by an automated production line at a time. The product is designed specially for bathroom, roof and underground waterproof system.

Advantage

- 1) Green product, non-toxic, odorless, no pollution.
- 2) Best cost and quality performance.
- 3) Good anti-aging, anti-oxidation and anti-corrosion characteristics.
- 4) Good flexibility, easy to bend, and does not break tensile and anti-perforation properties.
- 5) After the product is constructed, tiles and cement mortar can be decorated directly, which saves labor.

Application

1. Roof, bathroom, underground and tunnel.
3. Geo-synthetic liner for swimming pool, channels, irrigation system
4. Especially for projects with high requirements in durability, anti-corrosion and deformation.
