

RGM-BW Breathable Waterproof Membrane

Product Description

RG JIAYE RGM-BW Breathable Waterproof Membrane is a scientifically advanced housewrap designed for use within a variety of exterior wall assemblies. It provides excellent protection from wall damage due to water intrusion and condensation.

Advantage

High temperature resistance - use working temperature up to 250 °C.

Low temperature resistance - good mechanical toughness; 5% elongation even at temperatures down to -196 °C.

Corrosion resistance - It is inert to most chemicals and solvents, resistant to strong acids and alkalis, water and various organic solvents.

Weather resistant - the best aging life in plastics.

Highly lubricated – the lowest coefficient of friction in solid materials.

Non-adhesive - is the smallest surface tension in solid materials and does not adhere to

any substance.

Non-toxic - physiologically inert, long-term implantation of artificial blood vessels and organs without adverse reactions.

Application

Breathable Waterproof Membrane is suitable for building roof waterproofing, underground waterproofing, ground moisture proof, insulation layer steam separation, interior wall waterproof decoration, water dyke dam seepage, channel seepage prevention, pool storage seepage prevention, metallurgy, chemical pollution anti-seepage, pipeline waterproofing, mine Waterproof, et
