

RGC-SC Single Component Polyurethane Coating

Description

RGC-SC Single Component Polyurethane Waterproof Coating is made out of the main materials of isocyanate and polyether polyol, together with various auxiliaries and fillers by polyreaction, coating on the waterproof base layer, after chemical reaction of NCO terminal group of polyurethane prepolymer and moisture in air, it forms a jointless, flexible and strong rubber waterproof layer.

Advantage

- 1) Eco-friendly polymer waterproof coating: non-toxic, no abnormal odor.
- 2) Excellent waterproofness: It forms a complete and seamless membrane without any joints or leak possibilities after the coating curing.
- 3) It is specially suitable for waterproof construction where the shape is complex and pipeline bend place.
- 4) High solid content and excellent resistance to weather aging. It can be used as the exposed waterproof layer.
- 5) Simple and cold application: roller, airless spray, brush.
- 6) Long service life: Excellent resistance to the UV, oxidation and high temperature.

Application

- 1) It is widely used in roofing, basement, toilet, tunnel engineering, petrochemical pipelines, metals, containers and other waterproofing engineering, and can be used as decorative materials. It is widely used and easy to construct.
- 2) Most suitable for living pools, water towers, etc.
