

## RGM-MB-AP APP Modified Bitumen Membrane

### Description

RGM-MB-AP APP (Atactic Polypropylene) modified bitumen membrane is made by saturating the base in bitumen, or thermoplastic elastomer (such as APP, APAO, APO), reinforced with polyester or fiberglass, finishing the upward face with polythene membrane, fine sands or mineral slates (or grains) or etc.

### Advantage

- APP membrane is specially suitable for areas of high temperature and of strong sun-shine.
- No flow at High temperature, no brittle at low temperature, simple construction and no pollution.
- Excellent performance in Good impermeability, anti-puncture, anti-broker, anti-resistance, anti-erosion, anti-mildew, anti-weathering.
- Possess good tensile strength, elongation rate and size stability which could be well suited the substrate distortion and crack.

### Application

- Basement and roofing of key waterproof engineering, general and civil engineering.
- Bridge, road, granary, tunnel, park, swimming pool, sewage purifying pool and others.
- Especially adapting to the waterproof of structure changeable and cold area.
